Dear Sir or Madam,

Hambledon Flood Alleviation Phase 2 – Foul Laterals Investigation

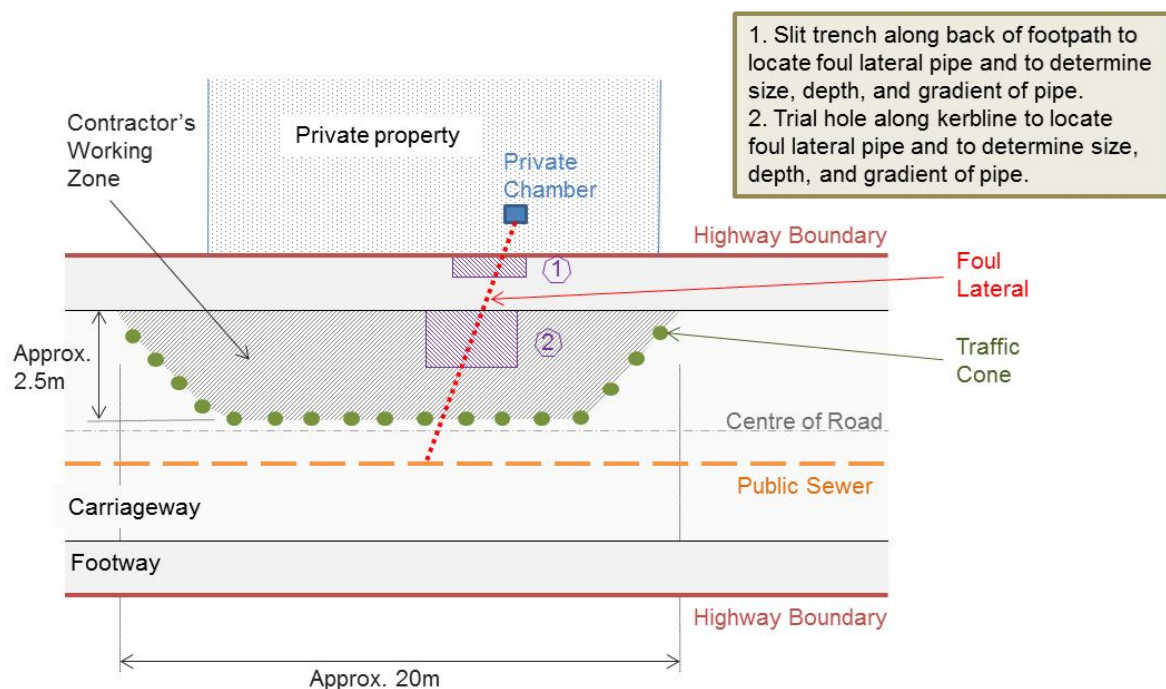

The County Council, working closely with the Environment Agency (EA), Winchester City Council, Hambledon Parish Council and other partners, is progressing plans for Phase 2 of the Hambledon Flood Alleviation Scheme.

As part of the preparatory work for this scheme, our contractor will be carrying out site investigations at a number of locations in the village from 23 February 2015. One of these will be in the immediate vicinity of your property and we wanted to let you know what would be happening and ask for your assistance.

The work will comprise carefully breaking up the existing pavement along the edge of the existing highway and along the back of the existing footway and digging trial pits in order to locate the existing foul lateral (i.e. the pipe that connects your property with the public foul water sewer) and take some measurements. The work at each location should be completed within a day and the surfacing reinstated. We will try to keep the areas affected to a minimum.

An indication of the proposed working area and temporary traffic management arrangements are shown in the diagram overleaf. Please note that one side of the road will be closed over the length of the works to provide a safe area for the contractor. The road will not be closed. If you normally park on the road, we would be most grateful if you could help the contractor by keeping the area in front of your property clear. This will help to minimise the amount of time needed and disruption to pedestrians and traffic.

Director of Economy Transport and Environment
Stuart Jarvis BSc DipTP FCIHT MRTPI

It would help when the works are undertaken if the contractor can open the cover of the private chamber within your frontage to determine the direction of the foul lateral from your property. Our contractor will contact you, ahead of the works to agree when access can take place. Giving them access should shorten the period they are working in front of your property.

We apologise for any inconvenience that this investigatory work might cause and thank you for your assistance. If you would like further information about the Hambledon Flood Alleviation Scheme please visit the dedicated website <http://www.hants.gov.uk/hambledon-flood-alleviation> or, if you have specific questions, email us at hambledon@hants.gov.uk.

Yours sincerely,

Chris Murray
